DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 15-19, 22, 24 and 26-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Referring to claim 15: It is unclear what is meant by “determining the number of elementary streams of the identified program, wherein the number of PID values in the set of PID values assigned to the elementary streams of the program is less than or equal to the number of elementary streams of the identified program” (lines 10-12). It is unclear why the number of PID values in the program is less than or equal to the number of elementary streams in the identified program. Furthermore, the specification does not explain this limitation.

Referring to claim 16: It is unclear why the first and second programs each have “a PMT identified by a PMT_PID value associated therewith” (lines 15-16) when a PMT_PID is already assigned to the session (line 6). It is unclear whether or not the PMT_PID associated with the PMT and the session is the same. It is also unclear how the “first and second PMTs have the same PMT_PID value” (lines 16-17) and whether or not the corresponding sessions also have the same PMT_PID value. Furthermore, the specification does not explain this limitation.
